PROFESSIONAL SUMMARY

Software engineer specializing in native Android and iOS development. Builds maintainable apps using modern UI frameworks (Jetpack Compose and SwiftUI) and architecture patterns (MVVM, Clean Architecture). Comfortable collaborating in Agile teams with designers, backend engineers, and QA to ship reliable features.

WORK EXPERIENCE

Mobile Application Developer
Vauldex Technologies Inc

Jan 2023 - Present

- Develop and maintain native mobile applications for Android (Kotlin/Jetpack Compose) and iOS (Swift/SwiftUI).
- Apply MVVM and Clean Architecture patterns to keep features modular, testable, and maintainable.
- Integrate REST APIs; implement authentication flows, local storage, and UI state handling.
- Collaborate in Agile/Scrum ceremonies; track work in Jira; participate in code reviews and QA cycles.
- Support release preparation, debugging, profiling, and basic test automation where applicable.

EDUCATION

Bachelor of Science in Electronics Engineering
Technological University of the Philippines - Visayas

2017 - 2021

Computer Engineering Technology
Technological University of the Philippines - Visayas

2011 - 2015

SKILLS

Kotlin / Jetpack Compose

Swift / SwiftUI

MVVM / Clean Architecture

REST APIs / Networking

Testing / Debugging

Git / CI/CD

INTERESTS

- Open Source
 - Performance
- UI/UX
 - Learning

STRENGTHS

Ownership

Problem Solving

Collaboration

Attention to Detail

LANGUAGES

English

Filipino

HIGHLIGHTS

- Ships production-ready features for Android and iOS using modern native UI toolkits.
- Builds reusable components and clean layers to speed up delivery and reduce defects.
